HISTORY

The Western University of Pennsylvania is the oldest institution of learning, with one exception (the University of Nashville), in the United States, west of the Appalachian Mountain range. It came into being as the Pittsburgh Academy in the year 1786, and was formally incorporated by Act of Legislature in February, 1787. It was re-incorporated as the Western University of Pennsylvania in February, 1819. It has educated in whole or in part more than six thousand of the young men of Western Pennsylvania and adjacent States, and its alumni have filled many of the most distinguished offices in the gift of the Commonwealth and the nations.

The growth of the institution has been rapid in more recent years, and the University is to-day the most largely attended institution of learning in its class in the State of Pennsylvania, with the single exception of its sister institution—University of Pennsylvania, located in Philadelphia.

The University has the following departments:

Collegiate and Engineering Department.
Department of Law.
Department of Medicine.
Department of Pharmacy.
Department of Dentistry.

SUMMARY OF STUDENTS BY DEPARTMENTS

SESSION OF 1904-1905

Collegiate	38
Engineering	122
Law	101
Medicine	279
Pharmacy	135
Dentistry	139
Total	814

CALENDAR FOR 1905-1906

1905

September 4.. .. ..Monday—Infirmary opens.
October 3.. .. .. ..Tuesday—Winter Term begins.
Recess from December 23 to January 1, inclusive.

1906

June 6.. .. ..Wednesday—Commencement.
June 7.. .. ..Thursday—Spring Term begins.

BOARD OF TRUSTEES

Date Elected

Class I, Term Expires 1907

1882. John Crockar White, D.D. . . . . *Pittsburgh*
1890. Benjamin Thaw, A.B. . . . . *Pittsburgh*
1893. James Crear Dunn, M.D. . . . . *Pittsburgh*
1894. Daniel Henry Wallace, Ph.B. . . . . *Pittsburgh*
1894. William Lucien Scaife, Ph.B., C.E. . . . . *Allegheny*
1895. Andrew Carnegie, LL.D. . . . . *New York*
1896. Robert Pitcairn . . . . . *Pittsburgh*
1898. Josiah Copley Thaw, B.S. . . . . *Pittsburgh*
1904. Francis T. F. Lovejoy . . . . . *Pittsburgh*
1904. J. Chris Lange, M.D. . . . . *Pittsburgh*

Class II, Term Expires 1905

1882. Rt. Rev. Cortlandt Whitehead, D.D. . . . . *Pittsburgh*
1885. John Wallace Sproull, D.D. . . . . *Allegheny*
1889. William Jacob Holland, LL.D., Ph.D. . . . . *Pittsburgh*
1891. John Alfred Brashear, Sc.D., LL.D. . . . . *Allegheny*
1898. Allan Campbell Bakewell . . . . . *New York*
1900. Calvin Wells . . . . . *Allegheny*
1902. George Hubbard Clapp, Ph.B. . . . . *Pittsburgh*
1902. Alexander Dempster . . . . . *Pittsburgh*
1904. Joseph Leonard Levy, D.D. . . . . *Pittsburgh*
1904. Henry Percival Bope . . . . . *Pittsburgh*

Class III, Term Expires 1906

1891. Thomas Dorrington Carnahan, A.M. . . . . *Pittsburgh*
1891. Hon. James Hay Reed, LL.D. . . . . *Pittsburgh*
1892. Cyrus Black King, M.D. . . . . *Allegheny*
1893. Andrew William Mellon, A.M. . . . . *Pittsburgh*
1890. James Henry Lockhart, A.B. . . . . *Pittsburgh*
1901. Emil August Schaefer, Pharm.D., Ph.D. . . . . *Pittsburgh*
1902. Hon. John Douglass Shafer, LL.D. . . . . *Pittsburgh*
1903. Thomas Harlan Baird McKnight . . . . . *Pittsburgh*
1903. Thomas Patterson, A.M. . . . . *Pittsburgh*
1903. Charles Felton Scott, A.B. . . . . *Pittsburgh*

Ex-Officio:

Samuel Black McCormick, D.D., LL.D., Chancellor . . . . . *Pittsburgh*
Hon. William B. Hays, Mayor . . . . . *Pittsburgh*
Hon. James G. Wyman, Mayor . . . . . *Allegheny*

FACULTY

SAMUEL BLACK McCORMICK, D.D., LL.D., *Chancellor.*

H. EDMUND FRIESELL, D.D.S., *Dean; Professor of Operative Technics and Crown and Bridge Work.*

OWEN L. HERTIG, A.M., D.D.S., *Professor of Operative Dentistry, Dental Pathology and Therapeutics.*

JAMES F. THOMPSON, D.D.S., *Professor of Prosthetic Dentistry.*

JOHN S. ASHBROOK, D.D.S., *Professor of Regional Anatomy and Comparative Dental Anatomy.*

STEWART L. McCURDY, A.M., M.D., *Secretary; Professor of Anatomy, Oral and General Surgery.*

CLEMENT R. JONES, M.D., *Professor of General Pathology, Materia Medica and Therapeutics.*

D. WILLARD FLINT, D.D.S., *Professor of Orthodontia.*

HARRY S. HASLETT, D.D.S., *Professor of Dental Anatomy, Anæsthetics and Extracting.*

WILLIAM L. FICKES, D.D.S., *Professor of Dental Ceramics.*

FREDERICK A. RHODES, M.D., *Professor of Physiology and Embryology.*

ALBERT F. JUDD, PHARM.D., *Professor of Physics, Chemistry and Metallurgy.*

FREDERICK CHARLES FRIESELL, D.D.S., *Professor of General and Dental Histology.*

LECTURERS

JOHN MILLER FREEMAN, *Lecturer on Dental Jurisprudence.*

RUSSELL H. BOGGS, M.D., *Lecturer on Electricity and Rœntgen Rays.*

DEMONSTRATORS AND ASSISTANTS

EDWARD C. HAWKINS, D.D.S.,

HARRIS D. HOWARD, D.D.S.,

ALEXANDER E. BARD, D.D.S.,

W. SCOTT CLARK, D.D.S.,

ROBERT ZUGSMITH, D.D.S.,

M. ROSS GIBSON, D.D.S.,

ABRAM CHRISTY BARCLAY, D.D.S.,

FRANK HOWARD MAGILL, D.D.S.,

HARRY BLACK REAMER, D.D.S.,

WILTON ALLEN WOODBURN, M.D.,

FREDERICK JOHN BLUMENSCHEIN, PHARM.D.,

M. PARK JOHNSTON, D.D.S.,

A. B. WALLGREN, M.D.,

W. H. ROBINSON, M.D.,

PROF. SAMUEL ANDREWS, Superintendent Pittsburgh Public Schools, Examiner of Students who desire to enter this College.

GENERAL INFORMATION

The Pittsburgh Dental College is the Dental Department of the Western University of Pennsylvania. Its classes, however, are conducted independently of the other departments.

Senior students who have passed the required grades and have otherwise complied with the rules of the College are recommended by the Faculty of the department to the Board of Trustees of the University for their degree, the same being conferred by the Chancellor.

Diplomas are signed not only by the Faculty of the Dental Department, but also by the Chancellor and President of the Board of Trustees, and to them is attached the seal of the University.

A candidate for the degree of D.D.S. must have attended three full courses of lectures in some reputable dental college, the last one of which must be in this school. He must be 21 years of age, and of good moral character.

The Pittsburgh Dental College is a member of the National Association of Dental Faculties, and is governed by the regulations of that organization.

REQUIREMENTS FOR ADMISSION

Extracts from the Code of Rules of the National Association of Dental Faculties:

"The minimum preliminary educational requirement of colleges of this Association shall be a certificate of having passed the second year of a high school, or its equivalent, the preliminary examination to be placed in the hands of any state or county superintendent of public instruction."

"No member of this Association shall give credit for a full course to students admitted later than ten days after the opening of the session, as published in the announcement."

"That students in attendance at colleges of this Association, to obtain credit for a full term, must be and remain in attendance until the close of the session."

Students presenting credentials from reputable schools, medical, scientific or literary, for work done in branches taught in this school, and covering these branches fully or in clearly definite part, will be credited for such work, provided that such credits shall amount to as much as one-half year.

COURSE OF STUDY, WITH BRANCHES TAUGHT

FRESHMAN YEAR

Anatomy.
Two lectures per week.
- Osteology, Arthrology — Ante-Holiday.
- Myology, Angiology — Post-Holiday.

Laboratory. Throughout the year.
Physics and Electricity.
Dental Anatomy, completed.
Operative Technics.
Prosthetic Technics.
Dissection. One part.
Embryology, completed. Ante-Holiday.
Histology, completed. Post-Holiday.
Materia Medica. Throughout the year.
Chemistry. Inorganic. Lectures and Laboratory.
Physiology. Throughout the year.
Regional Anatomy. Ante-Holiday.

JUNIOR YEAR

Anatomy.
Two lectures per week.
- Brain, Nervous System — Ante-Holiday.
- Viscera, Special Organs — Post-Holiday.

Dissection. Two parts.
Comparative Dental Anatomy.

Operative Dentistry.
Prosthetic Dentistry.
Physiology. Throughout the year.
Metallurgy.
Principles of Surgery. Post-Holiday.
Bacteriology.
General Pathology. Lectures and Laboratory.
Dental Histology.
Crown and Bridge. Lectures and Technics.
Practical Metal Work.
Operative Technics.
Prosthetic Technics.
Physical Diagnosis.
Infirmary Practice.

SENIOR YEAR

Dental Pathology.
Dental Therapeutics and General Therapeutics.
Oral Surgery.
Clinical Surgery.
Jurisprudence.
Applied Electricity, including Rœntgen Rays.
Dental Ceramics.
Local and General Anæsthetics.
Operative Clinical Practice.
Continuous Gum Dentures and Obturators.
Orthodontia.
Operative Dentistry.
Prosthetic Dentistry.
Organic Chemistry.
Dental Materia Medica.

OPERATIVE DENTISTRY

Professor O. L. Hertig

The principles and practice will be taught by the application of systematic procedures to operations in classes, so that a correct judgment may be formed as to their application in particular operations.

The same method of instruction will be applied by clinical instructors, students in classes being divided into sections.

Modern and accepted methods will be exemplified.

The infirmary is open throughout the year, except during the months of July and August.

INSTRUMENTS

Each student, before beginning his work, is required to procure the instruments necessary for his use, a list of which will be furnished. Each Senior student is required to have a dental engine.

All materials used upon patients, including medicines, napkins, rubber dam, etc., furnished by the college.

DENTAL PATHOLOGY, MATERIA MEDICA AND THERAPEUTICS

Lectures from this chair will comprise instruction in the principles of dental pathology, indication and elements of disease, pathological dentition, pathological eruptions, dental caries and its results, odontalgia, periodontitis, alveolar abscess, necrosis, pyorrhœa alveolaris and all the various diseases of the teeth, and associate parts, with the therapeutic agents and materials used in the treatment and correction of the same.

OPERATIVE TECHNICS

Professor H. E. Friesell

The object of this course is to make the student thoroughly familiar with the organs to be operated upon, together with the principles that underlie all operations upon the teeth, and to provide a systematic course in manual training.

Students will have before them teeth of each denomination, so that right conceptions of form and the relations of the tissues may be studied.

Systematic nomenclature will be impressed upon the mind.

Shaping the definite outlines, markings, and the cutting of sections of each tooth will be practiced.

Shaping cavities, from the simple to the more complex, on models and the teeth in forms, using the different filling materials, scaling, bleaching, and, as far as possible, all manipulation of the operative procedure, will be required.

Every student will be required to perform each operation separately in an acceptable manner.

This course will be under the immediate direction of the Professor of Operative Technics.

CROWN AND BRIDGE WORK

A complete course in Crown and Bridge Work, both fixed and removable, will be given the Junior and Senior classes.

The subject will be considered didactically and practically. The various methods of preparing roots, all the accepted styles of crowns and bridges, and the most practical systems of bridge work will be taught.

DENTAL PROSTHESIS

Professor J. F. Thompson

The course will cover Prosthetic Technics, followed by the preparation of the mouth for dentures, impressions, methods of constructing various bases, treatment of metals and alloys which may be of value in dentistry, Continuous Gum Work, the study of temperaments in their relation to the teeth and their arrangement, Artificial Vela, method of making and adjusting appliances for fracture of the maxillæ. Besides the patients in the clinic, living models are employed for the students to work upon.

COMPARATIVE DENTAL ANATOMY

Professor J. S. Ashbrook

In this division of general anatomy the student will be taught comparative anatomy by the study of Animal Life, beginning with the lowest forms, and leading up to the highest in regular gradation; taking the teeth seriatim from the lowest types, and showing their progressive evolution from simple to complex forms, demonstrated by skulls, models, charts and stereopticon.

This subject is a strong factor in emphasizing the importance of the law of occlusion.

REGIONAL ANATOMY

Special instruction will be given in Regional Anatomy on the regions of surgical importance to the dentist as follows: (1) Maxilla and Antrum of Highmore; (2) Mandible and Tempero-Man-

dibular Articulation; (3) Salivary Glands; (4) Muscles of Expression and their relation to facial art; (5) Osseous deformities of Head and Face; (6) Nerve and blood supply of teeth, etc.

ANATOMY

Professor Stewart L. McCurdy

Outline of Course:

Freshman Year, Ante-holiday, Osteology and Syndesmology; Post-holiday, Muscles, Blood Vessels.

Junior Year, Ante-holiday, Nervous System; Post-holiday, Organs of Special Sense and Viscera.

Instruction in this department consists of lectures and demonstrations of the anatomy of the entire body, special lectures being given upon regions of the face, head and neck.

Surgical and Topographical Anatomy of face receives special attention as the study of the various parts is considered.

Students are required to make a complete dissection during the Freshman and Junior years.

To facilitate the study of Anatomy, boxes containing a half skeleton are given the student upon a deposit of $5.00, returnable upon return of box and the contents as it was received; or, student may keep the box, if he so desire, at no extra cost.

GENERAL AND ORAL SURGERY

Outline of Junior Course of Lectures

1. General Principles, including Repair.
2. Acute Infections and the Results.
3. Surgical Fevers.
4. Erysipelas.
5. Shock.
6. General Diagnosis.
7. Diseases of the Vascular Systems.
8. Asepsis and Antisepsis.
9. Anæsthetics.
10. Principles in Operations, Wounds and Emergencies.

Outline of Senior Course of Lectures.

11. Diseases of the Structures of the Oral Cavity.
12. Diseases of the Antrum and other Cavities.
13. Diseases and Injuries of the Gums and Alveolar Process.
14. Diseases and Injuries to the Tongue.
15. Diseases, Injuries and Neuroses of the Face.
16. Congenital Defects of the Face and Mouth.
17. Diseases of Bone.
18. Tuberculosis.
19. Venereal Diseases.
20. Diseases of the Salivary Glands.
21. Neuralgia.
22. Tumors.
23. Ankylosis.
24. Fractures.
25. Dislocations.
26. General Conditions Producing Oral Manifestations, and Oral Diseases Producing General Symptoms.
27. Plastic Surgery.
28. Prosthesis.

Operations in hospitals and clinical cases at the College will give the student an opportunity to make a practical study of cases.

A course in Physical Diagnosis is given in order that graduates of this school may be able to make an intelligent examination of the heart and lungs preparatory to the administration of an anæsthetic.

GENERAL PHYSICS

Professor Albert F. Judd

Properties of matter, theory of constitution of matter, states of matter, physical measurements, metric system of measures, volume, mass and density, specific gravity, force and equilibrium, hydraulics, hydrostatics and pneumatics, motion, velocity and acceleration, composition and resolution of forces, Newton's laws, gravitation, work, energy and power, machines, temperature and thermometry, specific heat, effects of heat, sound, radiant energy, light, electrostatics, electro-kinetics, sources of electric current, properties of electric current, uses of electric currents, dental applications of electricity.

GENERAL AND INORGANIC CHEMISTRY

Lectures, recitations and laboratory practice. The course is begun with a brief review of the history of the subject, the scope of the science, and its relation to the other physical sciences and to dentistry, with a consideration of the notation and nomenclature employed in modern chemistry. When this preliminary work has been accomplished, the important elementary substances are taken up in the order of their natural classification, and separately lectured upon. Contemporaneous with the lectures, every member of the class receives laboratory practice, which includes the preparation (when possible) of each element in the free state, the study of its leading characters and of its characteristic reactions. When the elements have all received consideration in this manner the class is given a brief drill in qualitative analysis, with practice in the identification of inorganic chemical substances in simple mixtures.

METALLURGY

Lectures, recitations and laboratory practice. The work is carried on with lectures and recitations from lessons assigned from the text-book. After the general principles of the subject have been reviewed, the manufacture and properties of amalgams and alloys receive consideration, followed by a study of the individual metals and their uses and application in dentistry, with laboratory practice in identification of metals, and in the manufacture and assay of alloys and amalgams.

ORGANIC CHEMISTRY AND CHEMISTRY OF ANÆSTHETICS

Lectures, recitations and laboratory practice. The lectures and recitations will be devoted to a consideration of the general principles of the chemistry of the Carbon Compounds, their classification and uses. In the laboratory the student is expected to prepare a series of the more important members, and to study their principal reactions and means of identification.

MATERIA MEDICA

Professor Clement R. Jones

During the early portion of the Freshman year special attention will be given to the definition of words and phrases, their derivation

and signification with reference to their use in Materia Medica, Therapeutics and Pharmacy. After this, the most important drugs in general use will be taken up and considered separately, with reference to their physiological effects, doses, methods of administration, their toxic effects, antidotes, etc. The same method of teaching is continued through the course.

GENERAL PATHOLOGY AND THERAPEUTICS

A thorough knowledge of General Pathology is necessary before the more advanced branches or special branches can be properly understood. Hence the object of the teaching in this department is to unfold to the student the fundamental principles of the subject, and bring them within his comprehension; also to increase his interest in the study of the subject, to obtain a knowledge of the inception and course of pathological processes, their changes and effects upon the organism as manifested in abnormal conditions.

ORTHODONTIA

Professor D. Willard Flint

Normal Occlusion, the etiology and classification of malocclusion, physiology of tooth movement, character of tissues involved, modern methods and appliances for the correction of malposed teeth, and correction as related to the harmony of the facial lines, facial art, are all included in the instruction in this branch.

The technical course consists of free hand soldering, soldering and adjusting combination appliances, and making of accurate models. The work is illustrated by stereopticon, charts and models and demonstrated by clinical cases.

DENTAL ANATOMY, ANÆSTHESIA AND EXTRACTING

Professor H. S. Haslett

This course will consist of the drawing, modeling and carving of the various teeth, and the study of their surfaces, ridges, fossæ, grooves, etc.

ANÆSTHESIA will be taught by lectures and demonstrations; will cover the whole field of local and general anæsthetics, the use, complications and dangers of each, and the means of preventing and treating accidents arising from their use.

The principles of Extracting will be taught by lectures and demonstrations in the infirmary. Particular attention will be given to difficult cases, impacted teeth, and the treatment of hemorrhage and such other accidents as may accompany extracting.

DENTAL CERAMICS

Professor W. L. Fickes

Instruction in this course will consist of one lecture each week, supplemented by demonstrations, in detail, of practical, operative and prosthetic porcelain work.

The more important subjects are: The history and development of the porcelain art; the composition, characteristics and manipulation of porcelain compounds; the source of heat employed; the use and care of furnaces, and descriptions and demonstrations of all the more important methods of inlay, crown and bridge and continuous gum work.

PHYSIOLOGY AND EMBRYOLOGY

Professor Frederick A. Rhodes

The subject of Physiology will be given to first and second year students. The teaching in this branch will consist of lectures, quizzes and practical demonstrations.

In the lectures it will be the aim of the teaching to continually keep in mind the fact, which is so little appreciated by the student, that the normal condition must be understood before the abnormal can be known. The student will be taught, as far as possible, to form his conclusions from facts of personal observation, and from those given to him by the demonstrations of the professor.

Each and every structure of the body will be shown, its function and its relation to every other structure. Special attention will be given to the subjects of blood, circulation, digestion and the nervous system, where these are so closely identified with important laws of interest to the dental student.

The lectures will be supplemented by quizzes, and each student will be required to pass an examination in all subjects which have been taught.

GENERAL AND DENTAL HISTOLOGY

Professor F. C. Friesell

The course in Histology consists of a systematic presentation of the subject of the minute anatomy of the various parts of the body. The subject is presented partly by systematic lectures, and more especially by the practical study by the individual students of actual specimens under the microscope. The methods of preparation of microscopical specimens are presented and praticed in the laboratory.

Lectures on Dental Histology embrace the origin, development, tissues and the functions of the teeth, and the development of the superior and inferior maxillary bones.

These lectures are fully illustrated by the projection microscope.

ELECTRICITY—X-RAY

Dr. Russell H. Boggs

X-Ray and electricity, as applied to dentistry, have been added to the list of branches taught in the college. The students will be taught the uses of radiography and will be given instruction in preparing and developing plates after they are made. The course will cover instruction in Electrophysics, Electrophysiology and Electrotherapeutics and the control of electricity as a motor power.

DENTAL JURISPRUDENCE

John M. Freeman, Esq.

The course of lectures on this branch will cover the subjects of Dental Witnesses, Rights and Liabilities of Dental Practitioners, including the Law of Crimes, Negligence and Contracts, as applied to the Practice of the Profession, together with a discussion of the History of Dental Legislation in General, and of the Statutes in Force in Pennsylvania Regulating the Practice of Dentistry.

The aim will be to furnish a correct idea of the general principles of the law as applied to the practice of Dentistry, and to present the subject with a view to making it of practical worth. Students will be required to keep concise, but complete notes of the lectures.

LABORATORIES

MICROSCOPY AND HISTOLOGY—FRESHMAN YEAR

Lectures, recitations and laboratory practice. The work in microscopy is preparatory to the subject of histology, and consists of a course of lectures upon the construction and manipulation of the compound microscope, with practice by the student in preparation of temporary and permanent mounts, including the technique of embedding, sectioning and staining, both of hard and soft tissues.

The laboratory is supplied with microscopes and all the apparatus necessary to render the student familiar with the subject of microscopical technology, as well as the normal Histology of the various tissues and organs of the body.

Special opportunities are offered for original investigation and research.

Students are required to mount at least twenty-five slides.

PATHOLOGY AND BACTERIOLOGY—JUNIOR YEAR

Students are required to mount at least twenty-five slides of pathological conditions, including tumors, diseases of the liver, kidneys, lungs, etc.

The bacteriological laboratory is equipped with a high-power microscope, containing oil-immersion lens, Abbe condenser and iris-diaphragm. It also contains incubator, dry and moist sterilizers, and every variety of apparatus known to modern bacteriology.

Students are taught rapid staining and mounting of secretions, principles of sterilization, method of isolating bacteria, technique of making plates, study of colonies, staining, mounting and examination of the more common varieties of bacteria, with special reference to bacteria found in the mouth.

TEXT-BOOKS

FRESHMAN YEAR

Anatomy—Gray.
Dental Anatomy—Black.
Physiology—Stewart or Kirke.
Materia Medica and Therapeutics—Potter
Dental Prosthesis—American Text-Book, Essig.
Chemistry—Simon, Beal.
Dictionary—Dorland or Gould.
Comparative Dental Anatomy—Thompson.

JUNIOR YEAR

Dental Histology—Broomell.
Operative Dentistry—American Text-Book, Kirk.
Regional Anatomy—Eckly.
Oral Surgery—McCurdy.
Bacteriology—McFarland.
Metallurgy—Essig, Beal.

SENIOR YEAR

Dental Pathology and Therapeutics—Burchard.
Dental Medicine—Gorgas or Long.
Orthodontia—Angle.

FEES

FRESHMAN YEAR

Matriculation (paid but once)	$ 5.00
Term ticket	100.00
Chemistry (including breakage)	2.00
Histology (including material)	2.00

JUNIOR YEAR

Term ticket	$100.00
Metallurgy	2.00
Pathology and Bacteriology (including material)	2.00

SENIOR YEAR

Term ticket	$100.00
Pathological Chemistry (including Urinalysis)	2.00
Graduation and Diploma	30.00

Fee for dissecting, $5.00 per part.

EXAMINATIONS

Examinations are held on the various branches taught in a given year at the close of that term. Mid-term examinations are held during the latter part of January.

The marking for examination is based on a scale of 100. Students, to pass their class examinations, must attain an average grade of at least 70 and must not fall below 60 in a single study.

Students of the Freshman and Junior classes falling below 60 in any study will be given the privilege of a second examination before the opening of the next winter term. A student may, however, be admitted to the class in advance if he be conditioned upon not more than two branches; but he must, during the term, pass examination in these branches before he can be examined on the studies of the year upon which he has entered.

GRADUATION

Candidates for the degree of Doctor of Dental Surgery must have attended three full courses of lectures in a regular dental college, or its equivalent (as required by the rules of the National Association of Dental Faculties), the last of which must have been in this institution. They must be twenty-one years of age and of good moral character and must bring before the professors of Prosthetic and Operative Dentistry such evidence of proficiency in practical dentistry as they may require.

REGULAR TERM

The regular winter term begins October 3, 1905, and continues for eight months, or until June 1, 1906.

STUDENTS MUST MATRICULATE BEFORE OCTOBER 13TH TO OBTAIN CREDIT FOR THE TERM, EXCEPT IN CASE OF SICKNESS. PHYSICIAN'S CERTIFICATE, 10 DAYS ALLOWED.

Students who fail to enter their names on the matriculation book or make application for admission before October 13th may enter upon the payment of $50.00, which amount will be deducted from the term ticket fee of the succeeding year. No time credit can be given upon such attendance.

FALL AND SPRING TERMS

The Infirmary is open from September 1st to July 1st of the following year. During this time patients in abundance are furnished the students for practical work. During the Spring and Fall terms, the Senior and Junior classes have an opportunity to complete their requirements in practical work. During these courses daily clinics are given by the Professors and Demonstrators.

NOTES

Seats and laboratory privileges are assigned in order of matriculation.

Since distilled water is furnished for drinking purposes, there need be no fear of contracting fevers or other diseases.

The Faculty will be glad to advise parents, when so desired, of the progress and general conduct of students.

According to the regulations of the College no fees are returnable. Should the student discontinue his studies, any fee or fees paid will hold good for a subsequent course, but they are not transferable.

Fees are payable in two installments; $50.00 at the time of entering, and no student is formally entered until this fee is paid; $50.00 during the month of January. No student is permitted to enter upon final examinations at the close of the term without a ticket of admittance, which is evidence that all fees are paid, and that he has passed all previous examinations. Graduation fee is returnable to those who fail to pass.

A deposit of two dollars is required from each student to constitute a damage fund, out of which school property damaged by students is repaired, when the particular offender is unknown.

Grades and cards are withheld from students who have not complied with the rules of the College.

Checks should be made payable to the Pittsburgh Dental College.
